

They give us
oxygen are lovely
beautiful + fresh

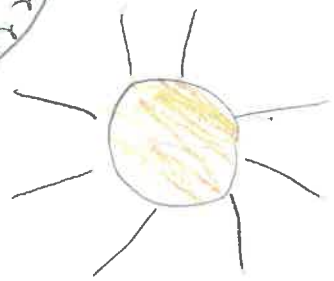

sophia

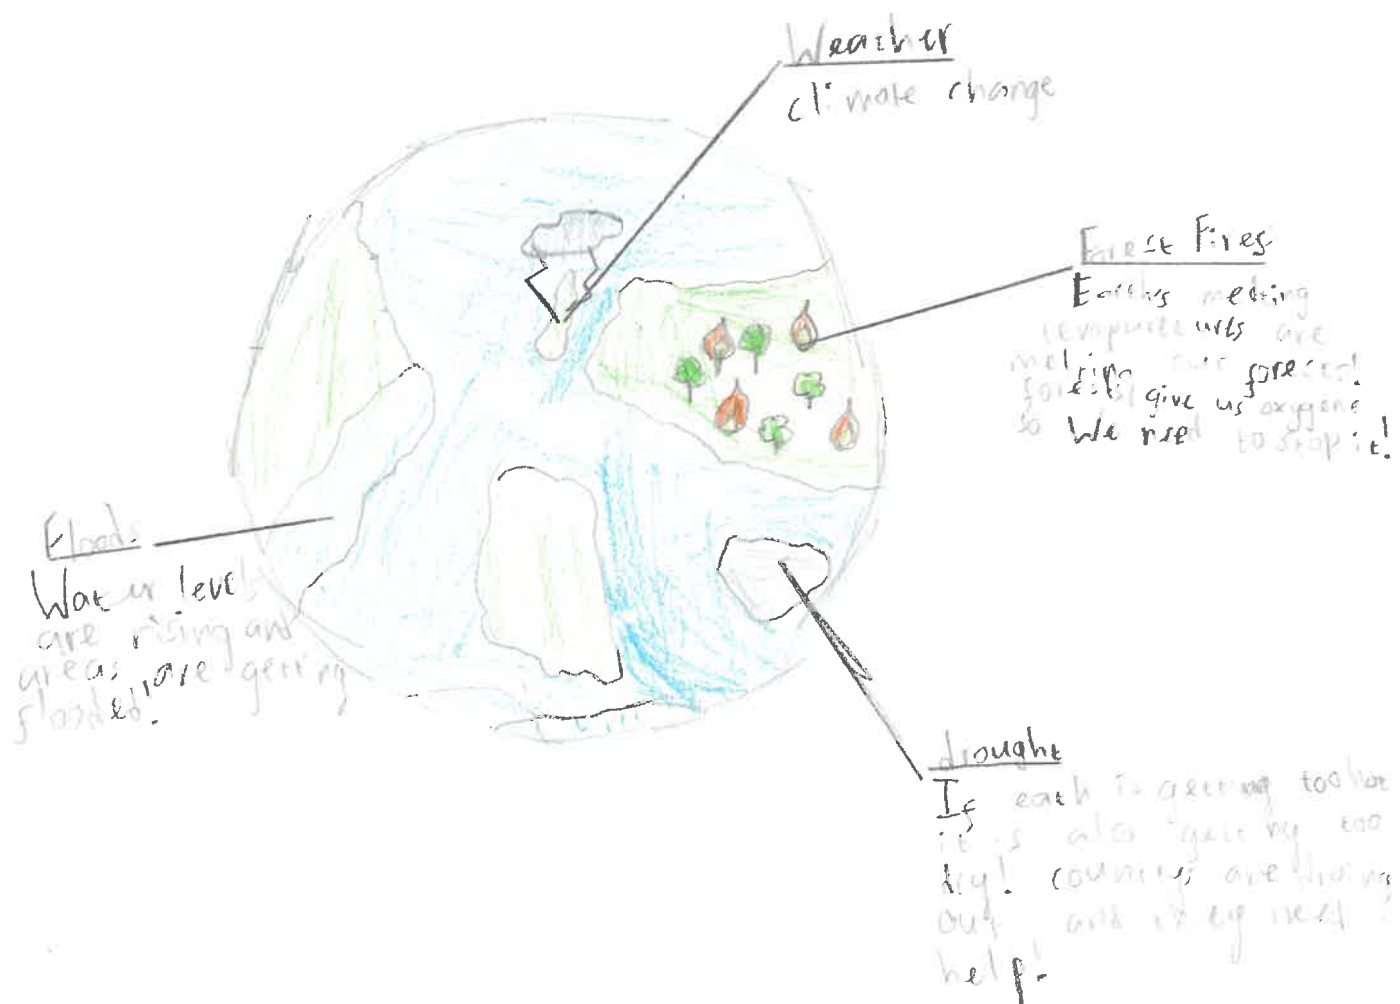

the world is
over heating this
is known as
global warming

there is something
around the world
could a greenhouse
if we didn't
have a green house
the sun would burn
the earth and we would be dead

EARTH IS MELTING

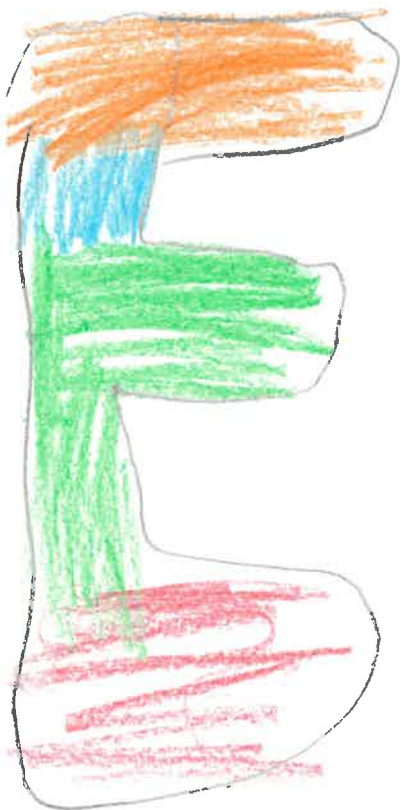

Climate Change

Climate Change is bad

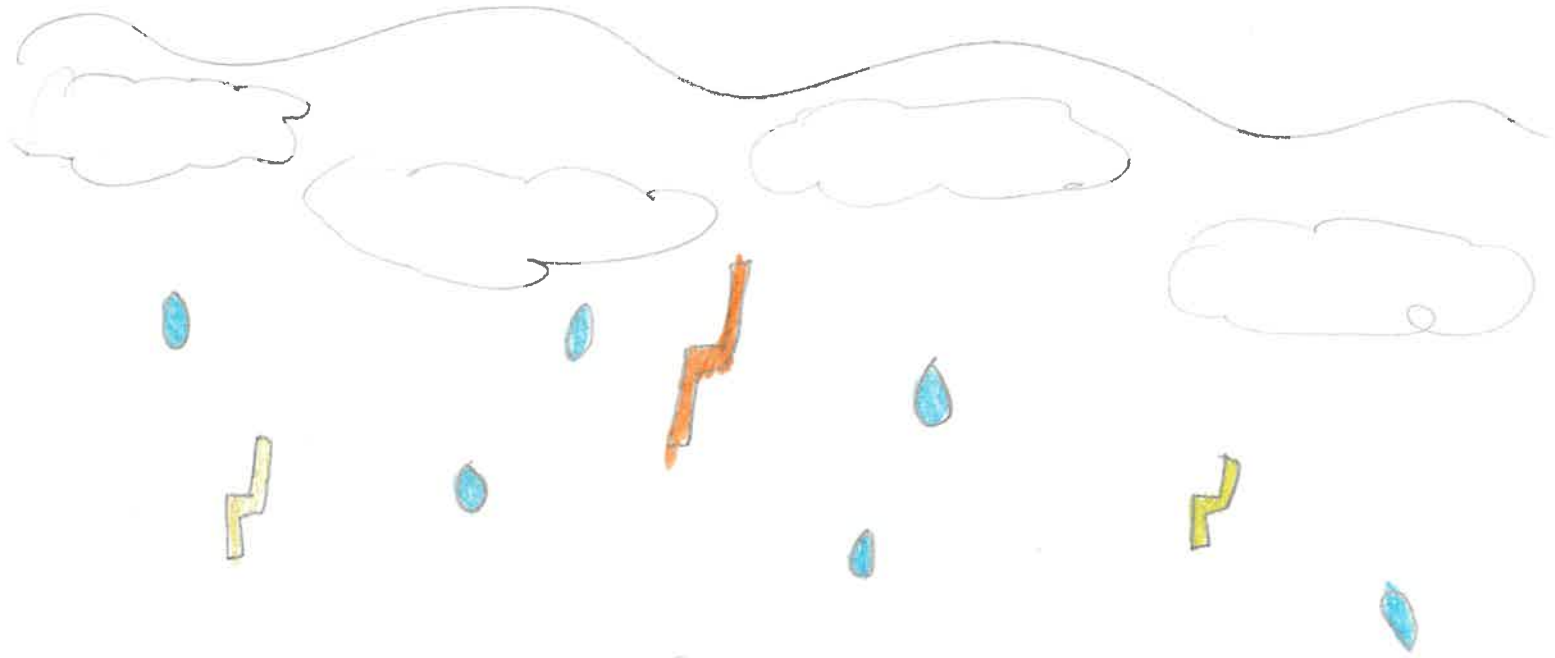

to stop choosing order of files lower
to prevent fires.

to hypercool
system

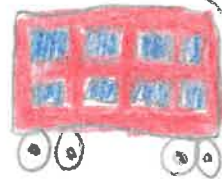

LET'S DO Something About THIS!

- Make LESS Gases
- Make it Rain LESS and have (no) floods
- Do anything for there (not) to have any more ~~any~~ Gases.

Less transp.

Climate Change

Robyn
Robyn

How to help
Plant trees
walk
cycle / scooter
or
run
use your
rubbish
as something

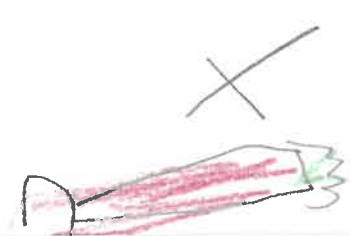

Go to your
shopping things
could be
used to
be stable
but now there
not

Things
used to
be
stable
but
now
there
not

Why because
if you chop
trees down
they give us
oxygen and
collects
abundant
de.

Cars
cause a
lot of gas
and it ruins
the world.

It causes
desised
goods and
other natural
disasters

CLIMATE CHANGE

FOR KS1 & KS2

MELTING ICE

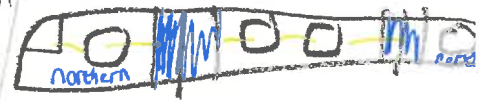

In the oceans, more ice is melting. This causes the sea levels to rise.

IT AFFECTS US

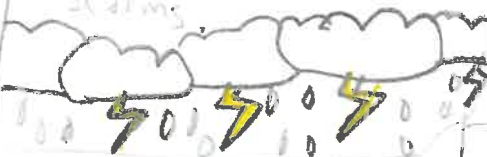

The warmth brings pollution to us causing diseases.

USE PUBLIC TRANSPORT

WEATHER

The warmth causes more storms.

RE USE

WHAT

CAN

WE

DO?

- Use bicycles.
- Do not cut trees

Animals release methane.

The heat bounces in the atmosphere
